

# Agent Verification Workshop — Panel

University of Liverpool, 11th September 2015

# Agent Verification Workshop — Panel

## Panelists:

- Kerstin Eder Bristol
- Brian Logan Nottingham
- Dave Parker Birmingham
- Michael Rovatsos Edinburgh

Panel chair: Michael Fisher Liverpool

Topic: *Agent Verification: Current Research Challenges*

Format: short opening statements by panellists, followed by broader discussion/argument.

# Agent Verification: Current Research Challenges

Panellists are asked to address some/all of the following questions:

1. What do you think is the single most exciting or important open problem or unanswered question that the field of Agent Verification should tackle?
2. A lot of research in Agent Verification is being driven by concerns around the certification of autonomous systems. What other areas, do you think, present significant and exciting challenges?
3. Thinking of challenges in terms of risks or dangers, is there anything the field of Agent Verification should be concerned about?
