Landscape Gardening Quote I

Requirements
(Taken from AQA HCSE Specimen Controlled Assessment v1.0)

Customers provide a landscape gardening company with a plan as shown in the diagram. Costs are as shown in the table. There is also a labour charge of £16.49 for every hour of work done.

<table>
<thead>
<tr>
<th>Work to be done</th>
<th>Unit cost of materials</th>
<th>Unit time to install</th>
</tr>
</thead>
<tbody>
<tr>
<td>Laying a lawn</td>
<td>£15.50 per m²</td>
<td>20 mins per m²</td>
</tr>
<tr>
<td>Laying a concrete patio</td>
<td>£20.99 per m²</td>
<td>20 mins per m²</td>
</tr>
<tr>
<td>Installing a water feature (e.g. a fountain)</td>
<td>£150.00 each</td>
<td>60 mins each</td>
</tr>
</tbody>
</table>

Create a Python programme that: (a) allows a user to input lawn and patio dimensions and the number of water features required (if any); and (b) outputs the cost for each, the labour cost and the total cost.
